

Top 10 DIY Home Organization and Storage Ideas

FRAMED HANGING JEWELRY

Supplies:

- Large artwork frame
- Various patterns and widths of scrap wood trim pieces that are wider than the frame
- Pencil
- Tape measurer
- Miter Saw
- Wood Glue
- White paint
- Wood Stain
- Paintbrush
- Throwaway paintbrush for stain
- Rag
- Hammer
- 18 x 3/4" wire brads
- White vinyl teacup hooks

How to:

1. Determine the order of boards from how they will line up inside the frame.
2. Measure the inside width of the frame and cut wood pieces accordingly.
3. Stain wood pieces, wipe away any excess stain, and let dry.
4. Paint the frame, let dry.
5. Turn frame over and apply glue around the inside edge of it. Working from top to bottom, place each board (unstained side up) one at a time on the back of the frame and then nail each piece into the frame.
6. Flip frame back over so the front is facing you and randomly screw the teacup hooks into the wood, all around inside the frame.
